## Top Country by Dividends

USA

## Best Company by Market Cap

APPLE

## Total Earnings by Company Name

## Best Company by Market Cap

## Total Earnings by Countries (Trillions)

GBP 7.58

## Observations:

- 1.Revenue by Country: The USA leads significantly with a total revenue of 22 trillion, which is far ahead of China and Japan, showcasing its dominance in the global financial landscape.
- 2.Top Dividends Yield: The USA ranks highest with 1 million, followed by Hungary and Israel, indicating strong investor returns in these countries.
- 3.Revenue by Company: Walmart and Amazon dominate with 25.3% and 23.0% of the total revenue, respectively, underscoring their massive market presence.
- 4.Earnings by Company: Saudi Aramco stands out with GBP228 billion in earnings, nearly double Apple's GBP122 billion.
- 5.Market Cap: Apple came top with GBP 3trillion market cap, reflecting its innovation-driven growth.
- 6.Price to Earning Ratio: Israel has the highest Price to Earning ratio, which suggests significant investor confidence in its top-performing companies.

## Recommendations:

1. Countries with lower dividend yields, such as Canada and Hong Kong, should implement policies to improve investor returns.
2. Governments can motivate startups and growth-stage companies to attract global investments.
3. Companies should adopt innovation-driven approaches like Apple and NVIDIA to enhance their market caps and earnings.
4. Diversified revenue streams, as seen with Walmart, can help sustain market leadership.

## Investment Opportunities

5. Investors should consider countries with high dividend yields (e.g., the USA, Hungary) for stable returns.
6. Companies with strong earnings and low market caps offer high growth potential for strategic investments.
7. Companies can use detailed market analysis to identify emerging industries and optimize resource allocation.
